

Introducing the world's first  
**DVD/CD Duplication Tower**  
 with an embedded  
**Ink Jet Printer!!!**

**PRINT TOWER**

(7"W x 16"H x 13.5"L - 26.1 lbs)

PDE Technology has introduced another unique solution for Churches, Schools and Businesses to duplicate and label their own CD's and DVD's. The "Print Tower" is a DVD/CD duplicator with an embedded ink jet printer and disc recorder. The Print Tower saves valuable workspace and allows users to record, print, and duplicate using the same piece of equipment. There's no need to create a master on your PC and then take the master disc over to a printer, and then move to another device to duplicate copies. It's all done in the Print Tower. The "Print Tower's" top drive is a combination of two devices; a DVD/CD disc recorder and an ink jet disc printer. While each can be used individually, this unit has the unique ability to burn (record) discs and print a label all within a single disc insertion. This means you can insert a blank, recordable, ink jet-printable disc, and then perform all burning and labeling functions. You can then immediately take that newly created master and make duplicates in the traditional duplicator on the lower part of the "Print Tower." Again, there's no need to move to a different device. The Ink Jet printer & Recorder is a USB 2.0 High Speed plug and play device. While it supports most software that can print to a Windows printer, the "Print Tower" comes standard with SureThing SE Edition CD/DVD Labeler software and also Sonic Record Now! Burning Software. It is designed to be used as a Stand Alone device when duplicating, no PC interface is required.

The "Print Tower" is currently available in a 3 drive configuration that consists of (3) DVD Writers, (1) 160GB HDD and (1) 1200 dpi ink jet printer. We also offer the same configuration with Blu-ray drives and a 500GB HDD. Larger Drive Configurations will be released in the future.

- Create a master
- Make copies
- Print labels
- All in the same unit!!

- 18X DVD/CD Duplication Drives
- Duplicator Controller
- Ink Jet Printer & Burner

- Activity LED
- Drive Status LED
- Ink Jet Printer & Burner

- Printer Drive Eject Button
- Ink Status LED
- Print Status LED

- AC Power Connection
- USB Connection
- Industrial Cooling Fans
